

# K9 Guard Ultra

The question every contractor hears on pet yard bids: "Will it smell?" K9 Guard Ultra answers that concern with confidence. It is the ultimate *pet turf with drainage system contractor supply*.

## Built for Superior Drainage and Odor Control

The system starts with full flow-through drainage construction — liquid passes through the turf face and backing rather than pooling on the surface. That drainage architecture is the foundation. On top of it, K9 Guard Ultra runs a dual infill odor management system: ZeoFill and Envirofill.

## What is ZeoFill?

ZeoFill is a natural clinoptilolite mineral that traps and neutralizes ammonia from pet urine at the source. Envirofill is a coated round sand infill that adds antimicrobial performance. Together, they work at the infill layer where odor actually forms, not just at the surface.

## Designed with Pets in Mind

The fiber is hypoallergenic — important for clients with dogs that have sensitive skin or breed-specific sensitivities. At 70 oz face weight, the density holds up under repeated pet traffic better than lighter-spec alternatives. Total weight and pile height are available from your CTC rep. 15-year material warranty applies.

Spec	Detail
Fiber Type	Heavyweight PE
Backing	Full flow-through backing
Infill System	3 layers -- ZeoFill: Envirofill: Zeofill
Warranty	15-year material
