

Signature 50

Why Choose Signature 50?

The Signature 50 is the landscape turf contractor wholesale entry point for standard residential landscape installs. It's built heavier than most competitors at this price tier, with a 53 oz face weight and 80 oz total weight backed by a double PP+PU system. That's not entry-level performance — it's entry-level positioning with mid-tier construction.

100% PE Construction for Better Durability

The fiber is 100% PE throughout. At this price point, some manufacturers substitute Olefin to cut costs. Olefin absorbs heat and flattens under repeated traffic and sun exposure. PE holds its shape, runs cooler to the touch, and recovers blade uprightness after foot traffic. For residential accounts, that difference shows up in year two and three when clients are still happy with the install.

Built for Versatile Residential Installs

At 1.5" pile height, the Signature 50 installs cleanly on standard subgrades and works across a wide range of front and side yard applications. The 15-year material warranty backs every roll.

Spec	Detail
Face Weight	53 oz
Total Weight	80 oz
Pile Height	1.5"
Fiber Type	100% Pure PE (Polyethylene)
Backing	Double PP + PU
Warranty	15-year material
