

# The Reserve

## Why Choose The Reserve?

When a client upgrades from "nice yard" to "showpiece," The Reserve is the product that earns the quote. At 80 oz face weight and 107 oz total weight, it's one of the heaviest-spec premium landscape products in the wholesale artificial turf market. The numbers hold up under scrutiny — and that's exactly what a premium 100% PE artificial grass contractor needs when a client is comparing bids.

## Designed to Last

The Reserve runs 100% Pure PE fiber from blade tip to base. PE's thermal properties are well documented: it absorbs less heat than alternative fiber types, which means the surface stays more comfortable in direct sun and the blades maintain their upright position over time. For backyard showpieces, HOA community installs, and high-visibility properties where the turf has to look installed-last-week two years from now, that's not a marketing claim — it's how the fiber behaves.

## Built on a Substantial Foundation

Pile height is available upon request from your CTC rep. The 107 oz total weight signals a backing system substantial enough to anchor this product on prestige installs. 15-year material warranty included.

| Spec         | Detail                              |
|--------------|-------------------------------------|
| Face Weight  | 80 oz                               |
| Total Weight | 107 oz                              |
| Pile Height  | 1.73 inches                         |
| Fiber Type   | 100% Pure PE (zero Olefin)          |
| Backing      | Double PP + PU                      |
| Infill       | 1.5-2.0 lbs Silica sand -20/40 Grit |
| Warranty     | 15-year material                    |
